

and customized catalogs then are produced for distribution via a broad range of media formats as required, including electronic delivery supporting SGML, Fixed Field Format, or via Internet-based applications.

CDG's IPC Authoring services include:

- Development of IPC content from engineering drawings/CAD systems, service bulletins, supplier data and customer input
- Compliance with Industry standards
- Issued on revision cycles to suit customer requirements
- Incorporation of all parts that are removable from the equipment and the replacement parts (includes optional parts and Supplier Line Removable Units - LRUs)
- Supports IPCs/Provisioning Data that can be customized to a specific fleet or any combination of serialized numbers
- Can accommodate internal part numbering systems as well as original manufacturer part numbers
- Digital output can be provided on hosted Internet or Intranet sites, in SGML tagged format in accordance with industry standards, in fixed field format, print image format, or as indexed digital data prepared for PDF output on CD-ROM

PROVEN CAPABILITIES

- One of the world's largest producers of Illustrated Parts Catalogs and other technically complex maintenance and repair publications
- Over 2 million pages of technical publications delivered for customers each week
- Production equipment includes hundreds of AutoCAD work stations and database authoring stations

- Extensive in-house Illustration, Drafting and Animation expertise, including experience with AutoCAD, CADkey,
- CATIA, CATIA CADAM, ProE and other leading engineering and illustration software applications.
- Thousands of highly customized software programs support CDG's parts and product catalog creation and revision management processes

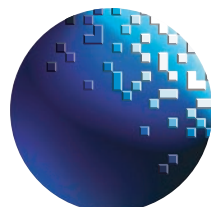

FLEXIBLE, RELIABLE, EXPERIENCED

Since 1969, CDG's core competencies have been centered upon information creation, conversion, manipulation and data management services. CDG is the global expert in compiling and converting raw engineering data into standardized, government and industry compliant documents.

CDG understands each customer's special requirements. Working closely with customers, CDG establishes process improvement plans focused on continuous quality control and assigns dedicated support teams to ensure customer satisfaction.

QUALITY CONTROL AND SECURITY PROVISIONS

With an extensive volume of work performed for government agencies, the defense sector and airline industry, CDG facilities must adhere to stringent security standards, thus insuring absolute confidentiality of your proprietary information. CDG's US facilities utilize an ISO 9001 certified Quality Management System, and its UK facilities have received an ISO BS EN9001/2000 accreditation for quality management. CDG is driven by the utmost commitment to the highest level of service, security, quality, and customer responsiveness.
