trilogiView

what is trilogiView?

An Integrated Technical Deliverable (ITD), *trilogiView* represents the next generation of Interactive Electronic Technical Publications (IETP) and is capable of integration with spares procurement, maintenance management and training systems to deliver a holistic information solution.

trilogiView contract

In December 2002 the Defence Logistics Organisation (DLO) awarded a contract to BAE SYSTEMS to supply and maintain 30,000 trilogiView Licences across the MoD.

Running for ten years the contract will save the MoD £millions and has positioned trilogiView as the viewer of choice for Land Sea and Air operations.

trilogiView summary

- XML/Open Standards-based Integrated Technical Data (ITD) solution.
- Open API, utilising XML data architectures, hence easily able to interface/integrate with external systems, either discretely or via web technology
- Integration with training/supply chain systems.
- Multiple delivery media options, e.g. CD ROM/DVD, Online, PCMCIA, wearables etc.
- Common architecture catering for current and future information standards across the tri-services.
- **trilogiData Solution**
Maximum consistency - minimum cost
- **trilogiPublisher**
In-house production with minimum investment
- **trilogiDeveloper**
Ultimate in-house flexibility for expert practitioners

product suite

To allow trilogi to become a truly tri-Service, multi-platform solution, it is advantageous for Original Equipment Manufacturers (OEMs) to produce trilogiView compatible data.

The differing service and licensing needs of these OEMs has led to a range of three trilogi packages offering the advantages of a common technical solution without imposing unnecessarily restrictive commercial models.

3 basic packages

trilogi Fact Sheet

w h a t i s t r i l o g i ?

trilogi – tri-service logistics information

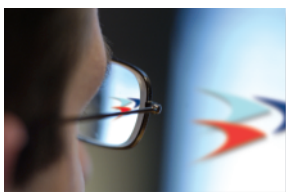

Based upon a pioneering partnering agreement between the UK MoD and BAE SYSTEMS, trilogi aims to boost operational performance and reduce costs through process change and the application of web-based technologies across the information supply chain. Delivering benchmark technical information services, trilogi adds value through convergence and optimum use of technology and innovation.
